Claims 1-10, 13-15 are pending in this application.

Claims 13-15 are drawn to non-elected inventions.

Claims 11-12 are deleted.

Response to Restriction

The election of group I, claims 1-10, in the Paper filed 10/27/08 is hereby acknowledged. Applicant further elects compound 14, page 85. Claims 1-10 are being examined in part in accordance with applicant election.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8, 10, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As written, the claims are confusing, not clear and therefore are indefinite. It is impossible to ascertain the metes and bounds of the claims. There are extensive substitutions and substitutions with substitutions so as made it impossible to ascertain the compounds excluded and/or included by the claims. The claims must be written in such way as to clear and distinctly point out the claimed subject matter. In patent examination, it is essential for claims to be precise, clear, correct, and unambiguous. *In re Zletz*, 893 F.2d 319, 13 USPQ2d 1320 (Fed. Cir. 1989).

It is not possible to classify and/or search the entire scope of the claims for practical reasons and technical limitations. While the limited examples in the specification are classifiable the entire scope of the claims cannot be classified as required under 35 USC 8 because the entire structures cannot be ascertained. See MPEP 903. Under 35 USC 8, MPEP 903, the scope of all claims must be classified. The class and subclass(es) must be searched to determine patentability. It is mandatory under the US patent practice that every allowed claim be classified. MPEP 904. While the statute may not require applicant to draft a claim in terms pertinent to the USPTO classification system, applicant should note that the Examiner needs not allow such a claim because the Office must perform its duty in conformance with 35 USC 8 and other relevant statutes.

By amending the claims as suggested under Status of Claims, subra, the rejection would be overcome.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, are rejected under 35 U.S.C. 103(a) as being unpatentable over Maillard et al., WO 02/02512 A2.

Applicant claims compounds of formula I, and their composition. The compounds are useful for treating Alzheimer's diseases.

Determination of the scope and content of the prior art (MPEP 2141.01)

The prior arts teach similar compounds, their compositions and method of use for treating Alzheimer's diseases. See the abstract and the examples on pp. 118-643.

Ascertainment of the difference between the prior art and the claims (MPEP 2141.02)

The difference between the instant invention and that of the prior art is that applicant claims alkyl instead of H by the prior art. Also the amine bearing R1 is a 3° instead of 2° amine by the prior art.

Finding of prima facie obviousness--rational and motivation (MPEP 2142.2413)

However, H and alkyl are art recognized equivalents. *In re Lincoln*, 126 USPQ 477, 53 USPQ 40 (CCPA, 1942); *In re Druey*, 319 F.2d 237, 138 USPQ 39 (CCPA, 1963); *In re Lohr*, 317 F.2d 388, 137 USPQ 548 (CCPA, 1963); *In re Hoehsema*, 399 F.2d 269, 158 USPQ 598 (CCPA, 1968); *In re Wood*, 582 F.2d 638, 199 USPQ 137 (CCPA, 1978); *In re Hoke*, 560 F.2d 436, 195 USPQ 148 (CCPA, 1977); *Ex parte Fauque*, 121 USPQ 425 (POBA, 1954); *Ex parte Henkel*, 130 USPQ 474, (POBA, 1960).

Also, 2° and 3° amines are obvious variants. *Ex parte Bluestone*, 135 USPQ 199 (1961). Therefore, the instant invention is prima facie obvious from the teaching of the prior arts. One of ordinary skill in the art would have known to claim the compounds and their compositions at the time the invention was made. The motivation is from

knowing that H and alkyl are equivalents and that 2° and 3° amines are obvious variants.

Status of Claims

Having found the elected species in condition for allowance and not been able to search the entire scope of the claims, additional species are searched "to the extent necessary to determine patentability." See MPEP 803.02. The search is extended to include compounds wherein R2-R3, R20, RN are as defined in claim 1; R1 is C1-C6-phenyl and RC is limited to isothiochromene which is attached as in the elected species. The phenyl and isothiochromene are optionally substituted.
